Professional Profile

Software Engineer with expertise in scalable systems, AI integrations, and data analysis tools. Proficient in TypeScript, React, Node.js, and cloud technologies, with a track record of building complex engineering systems and detecting data inconsistencies in applications.

Education

Federal University of Paraíba (UFPB) , Bachelor's Degree in Computer Engineering	2023 – 2027 (Expected)
Federal Institute of Rio Grande do Norte (IFRN) , Technical Degree in Informatics	2019 – 2022

Experience

Software Engineer , Sticky Games – Cayman Islands (Remote)	Dec 2023 – Present
- Built and enhanced the company's flagship AI-powered chat platform integrating multiple AI APIs and RAG techniques to generate JavaScript-based games. Supported text, image, and audio inputs, powering more than 100,000 unique chats with multiple interactions, enabling users to create and publish games automatically with contextualized responses. - Developed real-time monitoring dashboards for key business metrics by aggregating data from multiple systems. The solution became central to operations, eliminating transaction errors, resolving wallet inconsistencies, and reducing MTTR while improving overall user experience. - Developed an automated moderation system to evaluate users and generated games, dynamically adjusting visibility based on quality and compliance standards to ensure platform safety and content curation.	
Fullstack Developer , Acelerabit – Natal, RN, Brazil (Remote)	Oct 2022 – Dec 2023
- Delivered a healthcare form validation and submission system that reduced processing time from days to minutes and cut claim rejection rates by 50%, improving operational efficiency. - Introduced integration tests in previously untested systems, ensuring reliable communication between services and strengthening release stability. - Refactored legacy systems by resolving security vulnerabilities, modernizing outdated technologies, and improving performance, stability, and maintainability.	

Technologies

Languages: TypeScript, JavaScript, Python, SQL

Frameworks and Libraries: React, Next.js, Nest.js, Node.js, Material-UI, Chakra UI, LangChain, LangGraph

Databases: PostgreSQL, MySQL, MongoDB, Redis

Vector Databases: Elasticsearch, Qdrant, FAISS

Tools and Technologies: Docker, AWS, Firebase, Grafana, Sentry, Git, GitHub

Languages

Portuguese: Native

English: Fluent
